Doug,

That's great news! Can you please work with the Region to come up with an estimate of the work they will need to do and an estimated cost. Concurrently working with Ben Lessor & Shahid to figure out how to transfer funding to the Region.

Let's try to get together briefly today to discuss further.

Thanks,
Bruce

One thing I forgot – we briefed the RA today on a number of different financial assurance related topics, but we did have a brief discussion about the enforcement initiative and applying at these three sites, and the RA concurred. Just FYI, Ken

Hey everyone,

Sorry for the delay in getting you R10s site write-ups for the OECA enforcement initiative dollars. We want to add another site to the list, in addition to Grouse Creek (Hecla) and Delemar (Kinross) in Idaho – both of which are in closure but which lack financial assurance for long term water treatment – there is a prospective site in Washington – the Buckhorn mine and related tailings facility (a facility located about 10 miles away and contains tailings from a number of sites). I'm hoping I can have until Wed next week to get you short write-ups of each. Thanks, Ken
